

Appendices

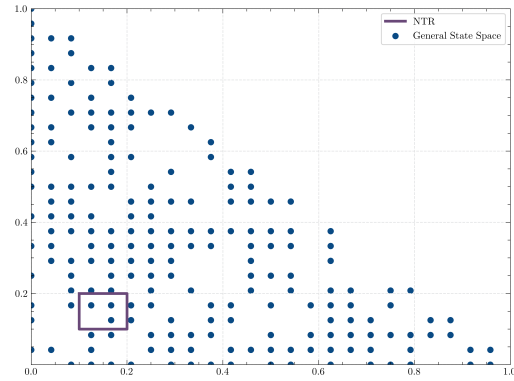

A Other sampling strategies

Figure A.1: Uniform grid sampling strategy

Note: Sample consists of $N = 200$ points.

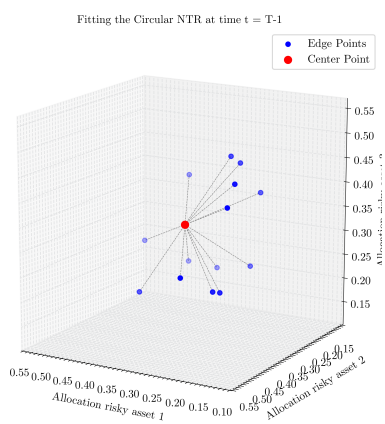

Figure A.2: Naive random sampling strategy

Note: Sample consists of $N = 200$ points.

B Fitting the 3D fixed cost NTRs

Figure B.1: Fitting scheme for the 3D sphere NTR

Fitting the sphere NTR with 3D data uses 14 points, more than necessary, to ensure a good fit
